This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

Botium Toys should prioritize implementing encryption for customer payment data, deploying an intrusion detection system (IDS), establishing a disaster recovery and backup strategy, and enforcing least privilege access controls. The company should also strengthen password requirements and implement a centralized password management solution. Additionally, asset inventory and classification processes should be established to improve compliance and reduce overall cybersecurity risk.
